EDUCATION

Howard University

BS in Computer Science and Mathematics

Aug 2022 – May 2026

Washington, DC

- **Co-curriculars:** HU Fintech, NSBE, ColorStack, GDSC
- **Certifications:** AWS Certified Cloud Practitioner, Google IT Automation with Python, Meta Back-End Developer

Google

Tech Exchange Scholar

Jan 2024 – May 2024

Mountain View, CA

- **Courseworks:** Software Development Studio, Applied Data Structures and Product management

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, HTML, CSS, Streamlit, React, Redux, Jest

Backend: Python, Java, C++, Hack, PHP, Spring, Django, Flask, Relay, JUnit

Dev Tools: Git, Docker, Jenkins, JFrog, Kafka, Maven, GCP, AWS, GraphQL

Databases: Oracle, MongoDB, MySQL, PostgreSQL

EXPERIENCE

Software Engineer

Meta, Inc.

May 2025 – August 2025

New York City, New York

- Designed and launched the **Comet Linked Artifact Finder Tool**, a full-stack developer productivity solution with a GraphQL-backed DAG visualization UI built using React, Relay, and ODS, enabling over **2,000 Web Platform engineers** to trace Comet artifact relationships and accelerating **discovery workflows** by **4x**.
- Developed a **VSCoDe extension** using internal APIs to display artifact DAGs directly in the editor through hover interactions on Comet entities, **reducing manual code searches** by **45%** and enabling **seamless integration** into developers' daily workflows.
- Spearheaded the **Trace Policy URL Tool** after completing primary project goals ahead of schedule, leading the initiative from **design doc to implementation**; built a GraphQL-powered mapping system and integrated VSCoDe extension to link trace policy annotations to live URLs, boosting debugging **efficiency** by **35%** for the **PREQ team** and broader **Web Platform org**.

Software Engineer

JP Morgan Chase & Co.

June 2024 – August 2024

New York City, New York

- Developed a full-stack **Q&A platform** for **JPMC lawyers**, employing REST APIs using Spring and crafting responsive, user-friendly interfaces with React and Redux to streamline inquiries.
- Collaborated with attorneys and legal analysts to gather and convert requirements into **scalable features**, writing over **150** unit and integration tests using Jest and JUnit to ensure **100%** test coverage and regulatory compliance.
- Implemented CI/CD pipelines with Jenkins, Maven for builds and JFrog for artifact management, **decreasing** deployment time by **60%** and **increasing** release frequency to **2X per sprint**.

Undergraduate Researcher

Department of Computer Science, Howard University

August 2023 – Present

Washington, DC

- Conducting research with **Dr. Anietie Andy** on therapist-client interactions by analyzing **20,000+** Reddit posts using **NLP** techniques to extract **sentiment patterns** and user experience insights, ensuring high-quality data through rigorous **curation** and **preprocessing**.
